

ClearTech polymer for a natural looking seal

ClearTech Polymer Binder

ClearTech polymer binders were purposely developed for aesthetics purposes in sealing and creating a wearing course for surfaces that require a natural look, but without dust.

ClearTech will bind any non-plastic materials, such as crusher sand or river sand into a hard wearing course seal – normally 10 – 20mm thick.

- PolyRoads - Internationally Agrément Certified

Benefits of ClearTech Seal

- Aesthetically attractive
 - Good strong wearing course
 - Can be applied over any stabilized or hard surface such as asphalt or concrete
 - Can be colour coded to fit into your environment
 - Easily maintained & repaired
 - Environmentally friendly
 - U.V Stable
 - Cost effective
- CLEARTECH USES
 - Private estate roads
 - Game Reserves
 - Bicycle tracks
 - Golf pathways
 - Walkways, driveways
 - Courtyards
 - Parking lots
