

PolySeal Dam Liners

POLYSEAL GEOLINERS

PolySeal is a third generation elastomeric polymer binder that is mixed with cement and sprayed onto a concrete or geotextile surface in three coats.

The liner remains totally flexible and impermeable and adheres to any shape or size.

BENEFITS OF POLYSEAL LINERS:

- Environmentally / fish friendly
- Spray-on – no seams
- U.V Stable
- Fireproof
- Cost effective
- SA Bureau of Standards Tested
 - SANS 5099, 5266 & 5300
- Australian certified – potable water
- Acid & Alkaline resistant
- PolyRoads - Internationally Agrément Certified
- 10 Year Warranty with maintenance contract
- POLYSEAL USES
 - Fresh water dams
 - Mining dams
 - Irrigation dams
 - Repairing concrete canals & reservoirs
